

M2-HAMSTER FINGERPRINT READER

Low Maintenance, Durable, Affordable

Fueled by our patent-pending Bio-Plugin™ technology, fingerprint recognition is permeating the commercial marketplace and being used in ways that seemed foreign only a few years ago. High throughput settings such as fitness clubs or school lunch lines require a fingerprint device that both captures a quality image and will not degrade with frequent usage. The M2-Hamster Reader from M2SYS was designed with these goals in mind and is meeting these challenges with success.

Features and Benefits

- ➔ Compact, ergonomic design ensures consistent image quality
- ➔ Durable frame and non-membrane based sensor surface translates into lower maintenance and longer lifecycle
- ➔ Works well with dry fingers
- ➔ Compatible with M2SYS Bio-Plugin™ and Enterprise Biometrics Suite™
- ➔ Reads fingerprints of smaller children
- ➔ More affordable than other readers in its category
- ➔ Supports multiple readers connect to a single PC
